Product Overview

Hitachi ID Management Suite is a complete identity management solution enabling organizations to more securely and efficiently manage the user lifecycle across enterprise applications and systems.

Hitachi ID Management Suite combines the power of Hitachi ID's flagship technologies, ID-Synch for user provisioning and P-Synch for password management, with more targeted products including ID-Access to manage user access rights, ID-Certify to review user rights and clean up stale privileges and ID-Archive to securely manage sensitive credentials.

Hitachi ID Management Suite creates real business value by increasing productivity for users, reducing IT overhead, strengthening network security and providing internal controls to support compliance with privacy protection and corporate governance regulations.

Hitachi ID Management Suite includes several functional identity management modules:

- ID-Synch – User Provisioning.
- ID-Certify – Access Certification / Periodic Audit.
- P-Synch – Password Management.
- ID-Access – Active Directory Group Management.
- ID-Org – Enterprise Orgchart Management.
- ID-Archive – Privileged Password Management.
- P-Synch/SSO – Reduced Enterprise Signon.
- ID-Telephony – Telephone-based Password Reset.
- ID-Discover – Login ID Auto-discovery and Reconciliation.
